Re: **Additional NOI Information Required**  
Shelbyville MS4 – Permit No. TNS075531  
Bedford County

Dear Mayor Cartwright:

On December 29, 2010, our office received Shelbyville's Notice of Intent (NOI) for coverage under the current Municipal Separate Storm Sewer Systems (MS4) permit. Our initial review has identified potential deficiencies regarding the following:

1. NOI Part V, Section 2 – Illicit Discharge Detection and Elimination  
*Illicit Discharge Ordinances* question #6 was answered with a "No", indicating that your current illicit discharge ordinance does not define penalties for violations. Each NOI question answered with a "No" must be addressed with a solution in your proposed program. Based on our review, the proposed activities for this section do not appear to include a specific solution.
2. NOI Part V, Section 4 – Permanent (Post-Construction) Stormwater Management in New Development and Redevelopment Program  
*Permanent Stormwater Controls Site Management Ordinance* question #2 was answered with a "No", indicating that your current permanent stormwater control ordinance does not require controls to mitigate pollutants in stormwater runoff. The proposed activities and measurable goals for this section indicated that deficiencies in the City Ordinances will be addressed; however, pollutant mitigation is not specifically mentioned. Managing stormwater runoff with detention typically only addresses the quantity of stormwater runoff, not the mitigation of pollutants in the stormwater runoff.

As a result, additional information intended to address these deficiencies must be submitted to our office within 14 days of the receipt of this correspondence. If you have any questions regarding the MS4 permit or the additional information required above, please contact me at (931) 560-1303.

Sincerely,

A handwritten signature in black ink, appearing to read "Scott Howell", written in a cursive style.
